Cuddalore, Tamilnadu - 607001, India

OBJECTIVE

Motivated and detail-oriented developer with a passion for building responsive web applications and enhancing user experiences. Seeking an opportunity to contribute innovative solutions, collaborate with dynamic teams, and grow within a forward-thinking organization by applying strong front-end development knowledge and problem-solving skills to real-world challenges.

EDUCATION

- **IFET College of Engineering** 06/2020 - 06/2024
B.Tech Information Technology Villupuram, India
 - GPA: 8.58/10.00

EXPERIENCE

- **CLOUDSTAR DIGITALS** Chennai, India
SEO Intern
 - Leveraged SEMrush to conduct keyword research and identify 20 high-impact keywords, strategically integrating them into blog posts to enhance user engagement and boost organic search rankings for the company.
 - Optimized over 150+ webpages by enhancing meta tags, headers, and URL structures, resulting in a 40% increase in organic search visibility.
- **AICI** Chennai, India
Full stack web development Intern
 - Developed five responsive landing pages using HTML5 and CSS3, achieving pixel-perfect designs that improved user engagement scores by 15% within the first month of implementation.
 - Orchestrated front-end improvements on the website, which accelerated page load times by 2 seconds; findings led to fixing the three biggest causes of crashes, and improved user satisfaction scores.
 - Crafted and maintained 50+ complex SQL queries optimizing database interactions, resulting in a 30% decrease in the average response time and improving overall application efficiency.
- **CISCO NETWORKING ACADEMY AICTE** Chennai, India
Networking Intern
 - Directed collaboration with networking team to build a resilient network infrastructure, expertly employing OSI model and core concepts, resulting in 99.99 Percent network uptime and zero data breaches.
 - Facilitated cross-functional team meetings and identified key network bottlenecks, which improved network issue resolution time by 40% and reduced downtime for critical business functions.
 - Maintained and updated asset records, coordinating with vendors to ensure 98 Percent on-time repairs and replacements, minimizing disruptions in IT operations.

SKILLS

- **Programming and Web Technologies:** Python, HTML/CSS, JavaScript, React.js, Redux
- **Database Management:** MySQL
- **Development Tools and IDEs:** VS Code, Android Studio

SOFT SKILLS

- **Communication and interpersonal skills**
- **Problem-solving**
- **Time Management**
- **Active listening**
- **Technical Curiosity**
- **Team collaboration**
- **Attention to detail**

CERTIFICATIONS

- THE FUNDAMENTALS OF DIGITAL MARKETING
- CISCO INTRODUCTION TO CYBERSECURITY
- CISCO CCNAV7 INTRODUCTION TO NETWORKS
- CISCO CYBERSECURITY ESSENTIAL
- IMPLEMENTING FACEBOOK API
- CISCO INTRODUCTION TO PACKET TRACER
- JAVA FULL STACK

PROJECTS

• TEMPERATURE SENSOR FOR ELECTRONIC GOODS

Nov 2021 - Feb 2022

Arduino IDE

- Integrated a DHT11 temperature sensor within a custom-built electronic cooler, activating automatically and maintaining a consistent operating temperature of 25°C, preventing heat-related failures.
- Integrated DHT11 sensor into custom cooling system, triggering fan activation when object temperature exceeded 25°C, maintaining optimal operating conditions and preventing potential heat-related failures within a two-week sprint.

• JOB APP USING ANDROID STUDIO

Mar 2022 - Jun 2022

Java, Android Studio

- Implemented advanced location-based algorithms and intuitive filtering features in job search application, decreasing user search time by 30% and increasing job application submissions by 15%.
- Designed clean and user-friendly Android UI layouts to ensure intuitive navigation, consistent design flow, and a seamless user experience across multiple screens.

• PREDICTING VEGETATION DYNAMICS USING CNN-LSTM NETWORKS

Jan 2023 - Jun 2023

Python, Matlab

- Deployed a CNN-LSTM model leveraging high-resolution drone imagery to track vegetation changes, achieving 92% accuracy in predicting spatial patterns, leading to refined environmental forecasting strategies.
- Implemented CNN for feature extraction and LSTM for time-series analysis of drone imagery, capturing temporal dependencies in vegetation growth, and reducing manual analysis time by 60 hours per week.
